 For less, because you don't need to access your heating system. Setting it in a too low place can affect temperature readings and make the heat work longer because the temperature is usually lower near the ground. If you already have a cable thermostat installed on the wall, you may be able to install a Nest Learning Thermostat in the same place. The place where you install or place your thermostat will depend on the model you have and whether you're going to install it on the wall or you're going to use a support. If you are not clear what model you have, refer to the article How to identify your Nest thermostat type. You can download it in the Apple App Store or Google Play. If the cone is not good, it may not be able to warm up your house. Note: Regardless of the thermostat you have, we recommend that you install a Nest Pro because the wiring is usually complex. Your thermostat detects the temperature of the area where it is installed to determine when it has to turn on the heating and maintain a pleasant atmosphere. Your thermostat uses activity sensors to determine if you are home or absent and to know how to change to Eco Temperatures to help you save energy. Place your thermostat at a height of between 75Å cm and 1Å m of the floor, on a flat surface. The app will guide you throughout the configuration process and show you a wiring diagram to know where you need to connect the cables. The Nest app will show you the steps you need to follow to install the Nest Thermostat E cable. Also, if you place your thermostat within that height interval, View away will work better. OverviewTech SpecsCompareIt saves energy.And keeps you cosy.The Nest Thermostat E is all set with a simple schedule to help you save from day one.Å3 It knows when everyone has left the house, then turns itself down so thatNot heating an empty home. And you can the nest thermostat e Anywhere You Like.watch the Installation Video> The Nest Thermostat and Is Compatible with Almost All Central Heating Systems. Choose the room or the area of your house that is used. You must have the nest application installed in your telåfå © phono to configure and start using the thermostat. Steps to install and use your Nest thermostat before starting to use the thermostat, you must follow all the steps indicated below: install your thermostat and heat link Note: Some of the instructions for installation instructions vary The thermostat model. If Heat Link is installed in another room, place your thermostat within the scope of the wireless connection of the Heat Link (at a maximum distance of 30 \* M). It is recommended that a professional be responsible for installing the Nest Learning Thermostat of 2 å. Follow the instructions of the application to install your Nest Thermostat E. Important: Your thermostat works better when it is always left in the same place, so try not to move it once you have chosen the right place. The thermostat only indicates to the system how much must be turned on or off, so the system must be connected to the electrical current of your house. Highlight that the area located in front of your thermostat is clear. Touches a product. Do not place your thermostat near heat sources or in areas with air currents. If you are on a shelf, try to place it as soon as possible from the edge. Download the thermostat documentation downloads the documents of our help center that will help you install and start using your Nest thermostat. Note: Sometimes, your thermostat can detect pets walking around the house, and this can prevent it from changing to Eco Temperatures when there is no one else. If asked, start your account. Some functions, such as automotive change to Eco Temperatures, depend on the thermostat being able to obtain consistent readings of temperature and activity from the same point of the house. Nest thermostats do not provide food to your home's heating system. Thus, your activity and temperature sensors can work properly. If you think that the thermostat you had before was not installed in a suitable place, contact a Nest Pro to help you find another better. However, as a function of the system you have, you should be able to install the Nest Thermostat E without help. Note: With occasional sunlight there is no problem, as the function Solar Block of your Nest thermostat can help adjust the temperature to the function of irregular rises and temperature patterns. Note: Sometimes, your thermostat can detect pets who are around the house, and this can prevent them from changing to Eco Temperatures when there is no one else. Make sure that your thermostat is within the reach of the Heat Link's inalmost conexiom (at a distance of 30Å m). Do not place your thermostat near heat sources or in areas with air currents. Find a Nest Pro installer If you want to use your phone to control your thermostat, receive monthly information about your energy consumption and do other things, you will have to configure the thermostat, connect it to the WiåfTMs network and add it to the Nest app. You can use our compatibility check tool to find out if your home is compatible with the Nest thermostat.
